# SMART LEGAL SOLUTIONS THROUGH A FRESH AND FUTURE-ORIENTED APPROACH

**G**.C.Hadjikyprianou & Associates LLC is a multi-awarded future-oriented niche law firm with a laser focus on commercial; tech and general business law services. The firm has its headquarters in Nicosia, the capital of Cyprus, and has a fully serviced office in the city of Athens, the capital of Greece. It is also a member of an exclusive private “Best Friends” network consisting of independent international firms with offices in 10+ jurisdictions and an in-depth worldwide experience, inter alia, in corporate, commercial, competition, employment, tax, digital & technology and banking & finance law. Through the said network, the firm is in a position to offer bespoke niche law services and smart legal solutions to its clients under Cypriot; EU and International Law. A testament of the quality of the firm’s performance is given by a host of independent world-class rating agencies such as the Legal500, the IFLR, the Best Lawyers, and the GLE which all consider it as a future-oriented high-quality next-generation law firm.

Founded during a period in which the world is changing on many levels, our firm is constantly seeking to identify new ways of bringing value to our clients and always striving to provide excellent and innovative services to them. We are passionate for the law; always focused on the provision of high-quality bespoke legal services and determined to ensure that our clients attain their business and personal goals. We stand for an inventive and efficient service at a high legal level, and always strive to be a true partner for our clients, working side by side with them rather than advising them from an “ivory tower”.

## A Unique Future Oriented Business Model

Going-against the conventional legal practice model, G.C. Hadjikyprianou & Associates LLC has taken the traditional law firm and transformed it into a fresh; flexible and easily accessible one-stop-shop for all the legal challenges a business may encounter during its lifecycle. Our unique business model allows us to develop specialised **tight-knit teams** for each and every case while having special regards to the needs of each client and the industry in which it operates. This modern business model gives us the ability to provide 360° legal services while maintaining the benefits of a boutique specialized law firm - **efficiency; flexibility; and personal attention**, amongst others.

The firm's team consists of experienced advocates; award-winning next generation lawyers; university professors; innovation experts and financial advisors with years of experience both on an

international as well as on a domestic level. Our **hybrid team** guarantees comprehensive and expert services across all major business sectors and ensures qualified and responsible assistance to our clients.

As a next generation law firm, we recognise that having a focused mindset and being able to offer personal attention to clients of any size is key for the **development of trust** and consequently for transforming a distant lawyers-clients relationship into a **deep long-lasting business partnership**. Without a doubt, in order to be able to work side by side with a client, lawyers must first have a deep understanding of the specific characteristics of the client’s industry and be able to offer holistic and pragmatic support to them. For these purposes, we ensure that in the tight-knit teams which we develop for each and every case, we engage, where necessary, external experts from our unique special advisory board in order to ensure

that the service delivered has always an industry specific focus.

**George C. Hadjikyprianou – Managing Partner:** *“We always treat our clients’ business as our own and continuously striving to be the partner we would want on our own team. For us, our clients do not merely have legal issues that need to be resolved efficiently and effectively, they have commercial opportunities that they need to take advantage of.”*

### Specialisation of the Firm

Our deep connections to the industry sectors mean that we are able to deliver bold, innovative and impactful solutions to our clients’ needs. More specifically, the firm provides specialised legal services on the following core areas:

- i. Banking & Finance
- ii. Blockchain; DLT & Tech Law
- iii. Commercial & Corporate Advisory
- iv. Data Protection; Privacy & IP
- v. Employment Law
- vi. EU & Competition
- vii. Financial Services & Regulated Entities
- viii. Investment Projects
- ix. M&A & Corporate Restructurings.

### Spirit of Innovation and Tech Solutions Offering

Embracing technological innovation is key for every business in order to adapt to modern markets and reach its ultimate growth potential. Our goal is to remain at the forefront of technological developments so as to maximize internal productivity and work closer to our clients. An important component of the vision of the firm is to always be a point of reference for our clients in fast-growing sectors such as the newly developed areas of Blockchain; DLT; Cyptos and AI.

We are extremely proud to have made substantial steps toward this

George C. Hadjikyprianou

goal during 2021. In particular, a major step in achieving this ambition has been the establishment of a **Next Generation Tech Hub** through strategic and exclusive partnerships with local and international academic institutions as well as international tech giants like **Pundi X** and **Panobly** which excel, amongst others, in the fields of Blockchain; Cryptocurrencies; AI and IoT.

In practice, this means that our lawyers are supported by a group of experts who deeply understand the challenges and the real technicalities behind newly developed technologies in order to ensure that any legal advice given in this area is not theoretical and vague but pragmatic and accurate. Through these partnerships, we strive to explain the intricate new tech regulations in plain and simple language to help our clients adapt to them wisely. Our aim in this area is to remove legal obstacles and guarantee compliance with local and international regulatory regimes so that our clients can fully focus on the implementation of their projects and ideas.

In addition, by combining our passion to the law and the deep tech knowledge of our global tech strategic partners, we are proudly

Joseph Borghese

developing tech solutions that envision to disturb the traditional way of doing things; create opportunities and tackle current challenges. More specifically, our team participates in the development of revolutionary tech solutions in the areas of **EduTech; MedTech; AgriTech** and **LegalTech**, supported by the latest available technologies. We are also thrilled to be working as exclusive operational partners with **Panobly** in one of their most ambitious pan-European NFT (“Non-Fungible Tokens”) project that is expected to revamp the digital sports and gaming industry.

This spirit of innovation and pioneering inspires the full range of modern services offered by G.C.Hadjikyprianou & Associates LLC and it is what makes us **more than just a law firm.**

**Joseph Borghese – Innovation Leader:** *“Through constant innovation, relentless client focus, and cutting-edge technology, we always envisage to enable companies to navigate today’s most complex challenges with confidence and connect with the opportunities that will shape their future.”*
